

REISSER  
**DNS<sup>®</sup>**

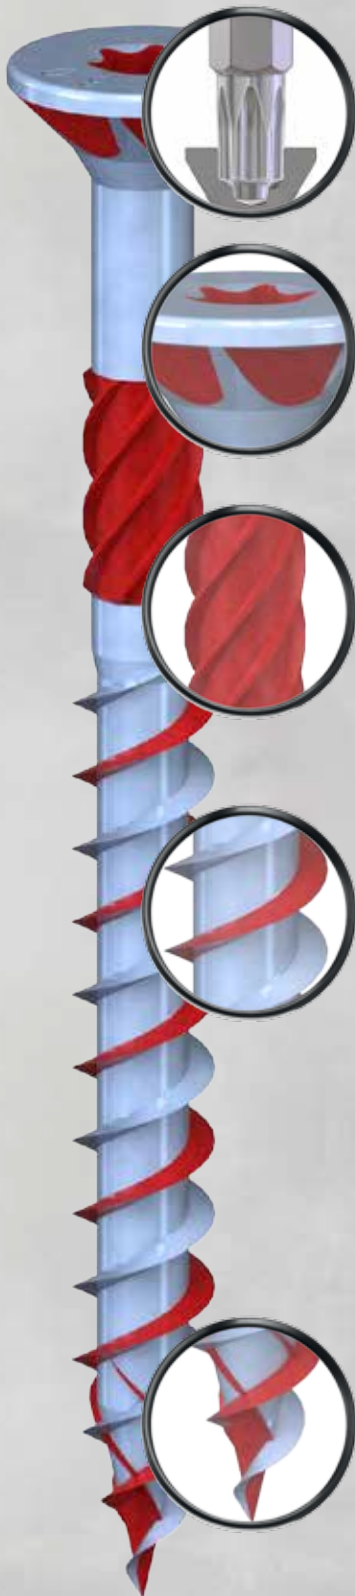

The new standard.

Chipboard screws

**REISSER**  
SCHRAUBENTECHNIK

### TORX<sup>®</sup>-ttap<sup>®</sup>

- No tumbling motion
- One-hand-assembly possible
- Only 3 dimensions for all diameters (10, 20, 30)
- Processing with standard TX bit possible

### Milling pockets

- Clean countersinking in wood and wooden materials

### End mill

- Reduced screw-in resistance
- Minimising of the tension in the wood

### Double thread

- Quicker fastening
- Optimal extraction values

### Material/Surface

- Case-hardened carbon steel
- Zinc plated blue, free of chrome VI
- Anti-friction coating reduces resistance when fastening

### SPI-tip

- Precise and immediate grip for fast work
- Minimises the splitting effect in the wood

## Field of application

- Interior works
- Furniture construction
- Wood structures

**TIP:** Also suitable for the fitting installation.

## Guaranteed safety

- ETA approval for use in wood construction

## Implementations

- Full thread
- Part thread
- Dimensions  
Ø 3 - 6 mm  
Lengths: 16 - 300 mm

## Processing recommendation

- Depending on the dimension and wood quality, pre-drilling may be necessary
