SCHRAUBENTECHNIK

# REISSER DRIBO®

For Softwood, hardwood, all types of chipboard

A neat surface – faster

- Milled ridges underneath head create perfect countersunk in wood
- No pre-countersunk required

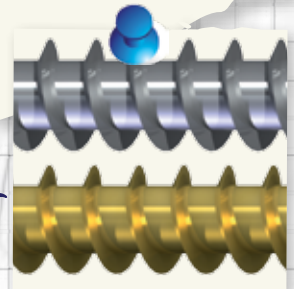

Guaranteed reliability

- ETA - approval guarantees quality

Also suitable for outdoors

- Thanks to A4 stainless steel

Custom colours on request

- Finish in zinc plated yellow and stainless steel uncoated

Ease of inserting

- Anti friction coating reduces resistance when fastening

Drilling, fastening and countersunk are carried out in one step, saving time

- The screw grips immediately thanks to the particular structure of its patented DRIBO® drill element

Self drilling fasteners save time, spare you of waste, and is saving you money in the end

- Patented DRIBO® drill element enables easy connection. Can be used for the smallest of mouldings, pictures frames etc., even close to edges without splitting the wood. Reduced wedging effect - prevents cracks

## Field of application

In steel for indoors, stainless steel for outdoors

- Interior works
- Furniture construction
- Wood structures
- Etc.

## Recommended use

- Pre-drilling is not required in most cases (depending on the particular characteristics of the wood, preliminary test required)

## Highlights

- Zinc plated yellow, stainless steel A4
- Partial thread with milled ridges underneath head
- Anti friction coating
- Patented DRIBO® drill segment
