# Wood connector screw

The screw for load-bearing connections

Wood construction

# Wood connector screw

The screw for load-bearing connections

## TX

- Excellent power transmission
- No slipping
- Secure application

## Pan head

- Flat contact surface
- High contact pressure
- Fits perfectly and looks great
- Suitable for hinges and fittings

## Reinforced shank

- Form-fitting connection

## Asymmetrical thread

- Low screw-in torque
- High pull-out forces

## SPI tip

- Precise and immediate screw start
- Keeps the splitting effect in wood to a minimum

## Material/surface

- Steel zinc plated blue
- Slide coating reduces the screw-in resistance

# RN 9259

Full thread

## Area of application

- Wood construction
- Formwork construction
- Renovation work

## Versions

- Pan head
- Full thread
- TX
- Ø: 5.0 mm
- Lengths: 25-50 mm

## Application recommendation

- Suitable for solid wood, laminated wood, board plywood, duo and trio joists, LVL from coniferous wood and hardwood (beech and oak).
- Sheet preform connections and connections with high loads can be removed.
- In contrast to nails, a screw connection in hard-to-reach holes is possible.
