

REISSER UHB

THE timber construction screw with under head thread, named UHB-screw

REISSER
SCHRAUBENTECHNIK

REISSER UHB

Safe and reliable assembly

- Optimal force transmission thanks to TX 40 drive

Ease of inserting

- Anti friction coating reduces resistance when fastening

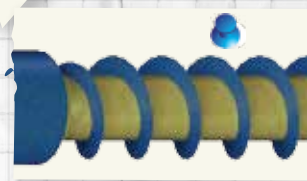

Quick and easy assembly

- The friction wings reduce the screw-in resistance for simple insertion

A neat surface

- The small cheese head on UHB-screws ensures flush countersinking in wood
- No pre-countersinking required

Secure hold

- Secure hold and load-bearing capacity thanks to the under head thread

Less discards ensures quality and saves money

- Special pre-drilling point prevents the material from splitting

Convenient and fast

- Immediate grip for fast and convenient work

Field of application

Load-bearing and non-load bearing constructs made of solid wood and glued-laminated timber. Coniferous woods in interior and protected outside areas

- Timber construction
- Roof construction
- Timber frame construction
- Rafter insulation, including for insulants which are not pressure-resistant
- etc.

Recommendation for handling

- No pre-drilling necessary*
- European Technical Approval ETA-12/0197

* Depending on wood type and the particular characteristics of the wood, preliminary test required

Highlights

- UHB screw with cheese head TX 40
- Steel zinc plated yellow, min. 5 μ
- Anti friction coating
- Under head thread
- Friction wings
- Special point
