Solid wood decking screws

A neat surface – faster

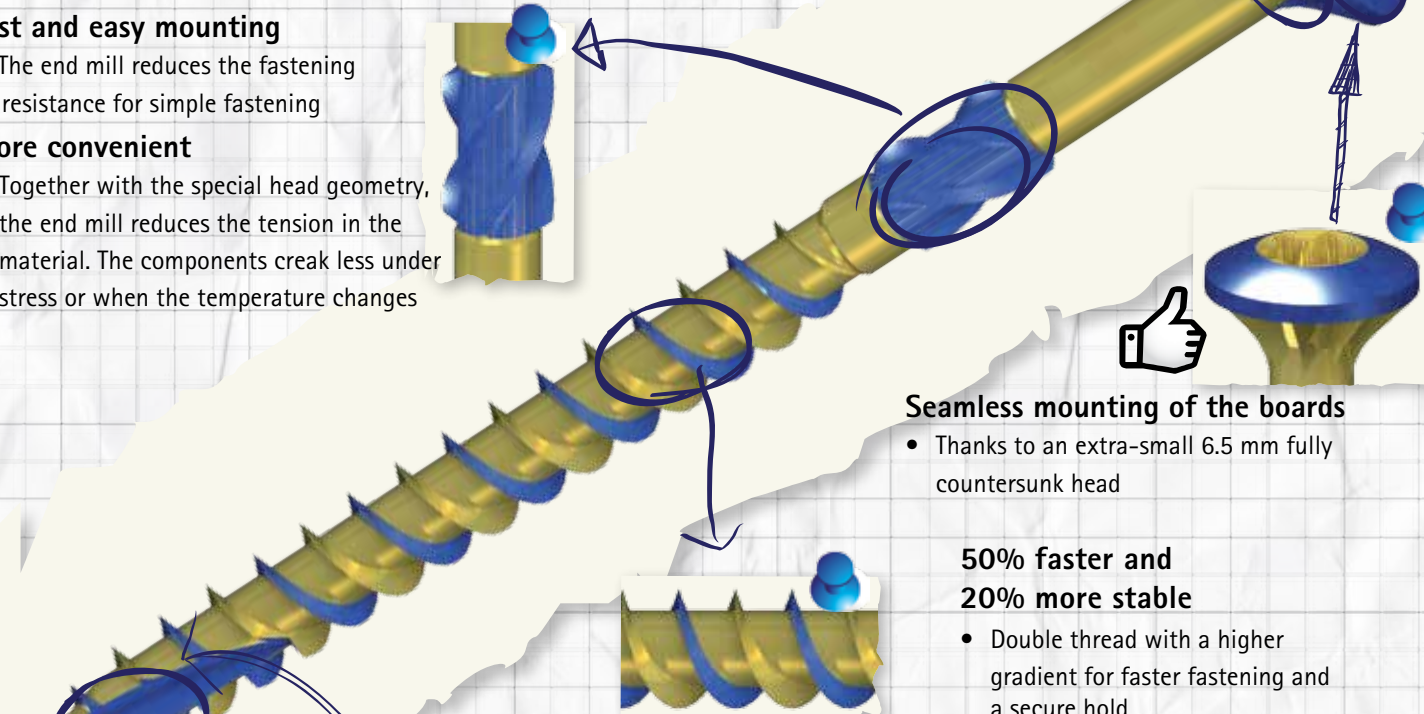

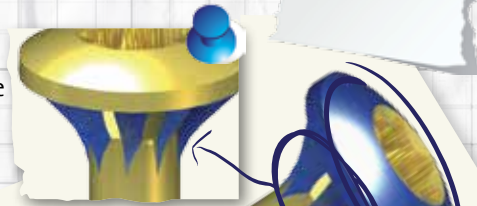

- Milled ridges underneath head create perfect countersunk in wood
- No pre-countersunk required

Fast and easy mounting

- The end mill reduces the fastening resistance for simple fastening

More convenient

- Together with the special head geometry, the end mill reduces the tension in the material. The components creak less under stress or when the temperature changes

Seamless mounting of the boards

- Thanks to an extra-small 6.5 mm fully countersunk head

50% faster and 20% more stable

- Double thread with a higher gradient for faster fastening and a secure hold

Ease of inserting

- Anti friction coating reduces resistance when fastening

Less discards ensures quality and saves money

- Collar pre-drills and prevents the material from splitting

Convenient and fast

- Immediate grip for fast and convenient work

Field of application

- Interior works
- Renovations
- Etc.

Highlights

- Countersunk head 6.5 mm
- Anti friction coating
- Milled ridges underneath head
- Collar
- End Mill
- Double thread and partial thread
- Zinc plated yellow
