REISSER Tongue and groove screws

A neat surface – faster

- Milled ridges underneath head create perfect countersunk in wood
- No pre-countersunk required

Better connection

- 2 separate thread sections function as a slide bar so that the material fastens better

Ease of inserting

- Anti friction coating reduces resistance when fastening

More convenient

- Head thread fastens the tongue and groove panel
- No annoying creaking

Less discards ensures quality and saves money

- Collar pre-drills and prevents the material from splitting

Convenient and fast

- Immediate grip for fast and convenient work

Field of application

Fastening tongue and groove panels for

- Refurbishing old buildings
- New buildings
- Renovations
- Etc.

Recommendation for handling

- Flowing screed should be laid between the wooden beams and tongue and groove panels

Highlights

- Zinc plated blue free of chrome VI
- 2 separate thread sections
- Anti friction coating
- Milled ridges underneath head
- Collar
